Environmental Policy

Ramsey Timber Group (RTG) will:

Constantly strive to lower the impact our business has on the environment. Through the streamlining of production, investment in energy efficiency and recycling codes we adhere to, we aim to minimise any negative impacts we might have on the natural environment.

To implement this policy RTG are committed to the following:

- To integrate environmental consideration into business decisions made at all levels.
- To increasingly source our timbers from FSC approved mills and develop a transparent Chain of Custody (CoC).
- To optimise the use of raw materials and resources to minimise waste.
- To recycle, as much as possible, waste products.
- To formally review the environmental policy at regular intervals, updating where required.

Our responsibility to the natural environment is the same as that we owe to our customers, employees and society at large. We are currently working towards established environmental objectives in order to provide a framework for continuous improvement and enabling a reduction in our environmental impact.

Signed

Mike Ramsey CEO
